Developer Documentation

Core SDK

@lacspace/api

Zero-dependency HTTP client

v2.1.1 · zero dependencies · generated 2026-09-01

Overview

The foundation everything is built on. Typed requests, predictable errors, automatic retries with backoff, request/response interceptors, query params, in-flight de-duping, response caching and cursor pagination — built on the platform fetch. A tiny axios / ky alternative that runs on Node, browsers, edge and React Native.

Package: @lacspace/api · v2.1.1

Kit: Core SDK

Runtime: zero dependencies

Install

```
npm i @lacspace/api
```

Quick example

```
api.get("users/me")
```

Returns: { id, name, ... }

Tips & warnings

TIP

Zero-dependency and isomorphic — safe to import on the server, in the browser, on the edge and in React Native. It tree-shakes, so you only ship what you import.
