MailKit — email for backends

@lacspace/email-verify

Deliverability checks

v1.0.4 · MX + SMTP · Node · generated 2026-09-01

Overview

Resolve a domain's MX records and optionally run a real SMTP RCPT probe to check a mailbox exists — without sending anything. Best-effort (servers greylist/catch-all), great for catching dead domains. Node only.

Package: @lacspace/email-verify · v1.0.4

Kit: MailKit — email for backends

Runtime: MX + SMTP · Node

Install

```
npm i @lacspace/email-verify
```

Quick example

```
await verifyEmail(email, { checkSmtp: false })
```

Returns: { **mxFound**: true }
