Security Kit — the seven layers, as code

@lacspace/redact

Log redaction

v1.0.3 · zero dependencies · isomorphic · generated 2026-09-01

Overview

Mask secrets & PII before they reach your logs — by sensitive key name (password, token, authorization...) and by pattern (JWTs, API keys, emails, cards, IPs). Deep, on strings and objects.

Package: @lacspace/redact · v1.0.3

Kit: Security Kit — the seven layers, as code

Runtime: zero dependencies · isomorphic

Install

```
npm i @lacspace/redact
```

Quick example

```
redact({ password: "x", token: "y" })
```

Returns: { password: "[REDACTED]" }

Tips & warnings

TIP

Zero-dependency and isomorphic — safe to import on the server, in the browser, on the edge and in React Native. It tree-shakes, so you only ship what you import.
