Developer Documentation

SEO Kit — everything crawlers & AI read

@lacspace/slugify

SEO URL slugs

v1.0.3 · zero dependencies · generated 2026-09-01

Overview

Turn any text into a clean, SEO-friendly URL slug — transliterates diacritics, collapses separators, truncates on word boundaries, and guarantees uniqueness against an existing set.

NOTE

When to use — Turning titles into URL-safe slugs consistently across your app.

Package: @lacspace/slugify · v1.0.3

Kit: SEO Kit — everything crawlers & AI read

Runtime: zero dependencies

Install

```
npm i @lacspace/slugify
```

Quick example

```
slugify("Héllö, World! — 2026")
```

Returns: **"hello-world-2026"**

Tips & warnings

TIP

Use the same slugify on write and on lookup so URLs always match.

TIP

Zero-dependency and isomorphic — safe to import on the server, in the browser, on the edge and in React Native. It tree-shakes, so you only ship what you import.
